

2014-2015 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 42, Oct 12th – Oct. 18th, 2014)

Highlights

- In week 42 of 2014, the majority of local influenza activity indicators increased, with a number of indicators above their baseline averages for this time of year.
- Geographic activity and local intensity designation (Click [here](#) for definitions) = SPORADIC, LOW
- Local medical facility labs reported 511 tests run with 12 (2.3%) positive results for week 42 of 2014.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms increased compared to the previous week. The percentage of ED visits for ILI and respiratory symptoms are above their baseline averages.
- The local over-the-counter medication sale trends generally increased (increase in cough and cold, thermometer, adult anti-fever, pediatric anti-fever, and throat lozenge sales; decrease in chest rub and electrolyte sales) compared to last week.
- In week 42, influenza activity was low in the United States. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: athenaHealth, Inc. and their analytics and research team athenaResearch (www.athenahealth.com). Rate of ILI visits to Franklin County, OH, athenaHealth network's primary care practices/physicians using claims data.

⁵Data Source: Google Flu Trends (www.google.org/flutrends), City = Columbus, OH. See website for additional details.

⁶Franklin County, OH residents only (based on zipcode).

⁷Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

CDC 122-Cities Mortality Reporting System: Pneumonia and Influenza (P&I) Mortality

In week 42 of 2014, 4.3% of all Columbus deaths were attributed to pneumonia and influenza (Figure 1). Nationally, 5.3% of deaths reported were attributed to pneumonia and influenza in week 42. This national percentage is below the national epidemic threshold of 6.0% for week 42.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 42, the preliminary local influenza-like-illness (ILI) visit rate (1.3 per 1,000 visits) to athenaHealth providers was higher than the previous week and is higher than the baseline average for the week (Figure 1). The week 42 percentage of Emergency Department (ED) visits for ILI symptoms increased compared to the previous week (Figure 3) and is higher than the historic baseline for this week. Pediatric urgent care visits for ILI symptoms was stable compared to the previous week and is similar to its historic baseline for the week.

Nationally, during week 42 of 2014, 1.4% of patient visits reported through the US Outpatient Influenza-like Illness Surveillance Network (ILINet), were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.0%.

Laboratory Surveillance

During week 42 of 2014, reporting Franklin County sentinel medical facility laboratories tested 511 specimens, with 12 (2.3%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2012 through week 42 of 2014 is 3,124 with 33 (1.1%) positives (18 type A, 14 type B, 1 type unknown). Nationally in week 42 of 2014, WHO and NREVSS laboratories reported 8,412 specimens tested for influenza viruses, 403 (4.8%) of which were positive (visit the CDC website for more info). The last 3 weeks national breakdown by type and subtype from CDC is shown in Table 1 below:

Table 1: U.S. Virologic Surveillance (WHO and NREVSS participating labs)

Week	A Total	A (H1)	A 2009 H1N1	A (H3)	A (H3N2v)	A (unable to sub-type)	A (Subtyping not performed)	B Total	Total # Tested	% Positive
40	185 (64.2%)	0 (0%)	1 (0.5%)	87 (47%)	0 (0%)	0 (0%)	97 (52.4%)	103 (35.8%)	8857	3.25
41	227 (59.6%)	0 (0%)	3 (1.3%)	84 (37%)	0 (0%)	0 (0%)	140 (61.7%)	154 (40.4%)	9986	3.81
42	268 (66.5%)	1 (0.4%)	3 (1.1%)	96 (35.8%)	0 (0%)	0 (0%)	168 (62.7%)	135 (33.5%)	8412	4.79

ODH lab reported results for Ohio cases that are PCR positive for seasonal influenza. ODH lab has reported no PCR positive tests for seasonal influenza.

ED and Pediatric Urgent Care Respiratory Visits

In the 42nd week of 2014, the percentage of all ED visits categorized as *respiratory* increased compared to the percentage seen the previous week and is above its historic baseline for this week (Figure 5). Pediatric urgent care visits for respiratory symptom visits also increased compared to the previous week and is similar to its historic baseline for the week.

Over-the-Counter (OTC) Medication Sales and Antiviral Prescriptions

In week 42 of 2014, trends for the local over-the-counter medication sales generally increased (increase in cough and cold, thermometer, adult anti-fever, pediatric anti-fever, and throat lozenge sales; decrease in chest rub and electrolyte sales) compared to last week.
